

Stability and Performance

STONGEST, MOST RELIABLE SYSTEM AVAILABLE

OPERATES SAFELY FROM THE GROUND –
NO CLIMBING REQUIRED

OPENS OR CLOSES IN JUST 20 SECONDS

The Industry's Strongest Tarp Frame is Also the Easiest and Fastest to Install!

FRONT ASSEMBLY

Hydraulic Cylinder

- No hydraulic pump required – The LID receives hydraulic pressure from the trailer's wet lines.*
- The hydraulic cylinder actuates the opening and closing of the tarp frame.
- Aero uses a continuous drive shaft design instead of a "ladder" type design. This means a stronger system for you, and is less susceptible to breakage and fatigue. This is much more stable and durable than competing systems.

Floating Link Assembly

- Mechanical floating link assembly eliminates the need for costly rack and pinion gears.

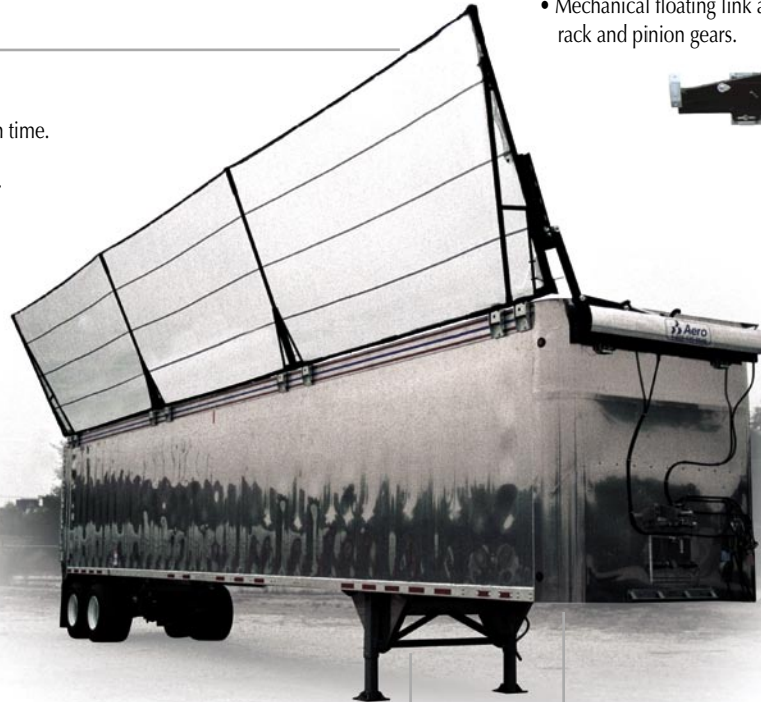

FRAME ASSEMBLY

Modular Frame

- Greatly reduces assembly and installation time.
- Minimal welding and bolting required.
- All components have a powder-coated or zinc-plated finish for longevity.

Swing Arm with Continuous Drive Shaft

- High-strength steel arms for years of solid service
- The LID has 4 arms for maximum strength and minimum tarp sag.
- Aero uses a continuous drive shaft design, which minimizes flexing and twisting and ensures smooth operation.

Polished Aluminum Wind Deflector

- Attractive wind deflector reduces air flow which could get under the tarping system.
- Keeps rain, sleet, snow and debris away from the front assembly.
- Protects operator from moving parts.

High-Strength Hinges

- The LID's innovative hinges offer the following benefits:
- Side-mounted hinges are better-protected against damage.
 - Just 16 bolts are used to mount the hinges – requires less labor to install!
 - Hinge locations can be moved around to accommodate obstructions – other systems use fixed hinges.
 - Hinges can be lubricated by anyone – reduces maintenance costs.

One Touch Operation!

- Operation couldn't be easier – just one lever allows you to operate system, increasing safety and reliability

* The LID's Electrical Conversion Kit is required for Tippers and other trailers without hydraulics.

Call Aero For All The Answers. We make it easy to get The LID that's right for your needs. Just contact your Aero dealer or an expert Aero customer service technician at 1-800-535-9545. They're trained to handle all your ordering, installation, and application questions. Call today!
